## Solutions – Acer Touch and Go

ACER TOUCH AND GO NOTEBOOK AND TABLET VENDING MACHINE FOR UNIVERSITIES. AN ALTERNATIVE APPROACH TO GIVING STUDENTS, TEACHERS AND STAFF ACCESS TO TECHNOLOGY

The Acer Touch and Go Notebook and Tablet vending machine allows Universities to provide access to technology in many new ways. The device can be set up in any secure location where there are students or researchers such as a library or lab. It automatically provides loan notebooks to students or researchers with a simple to use interface and can run completely unmanned and is supported by a national organisation. This presentation will demonstrate the features and benefits of the device and will show the business case

and the ROI for Universities who are interested in technology to create flexible learning spaces for our highly switched on mobile students and staff.

PRESENTER

Derek Walker, Acer
