

Designing for open/networked learning

In this presentation, Dr. Alec Couros will describe philosophies and pedagogical principles underlying his work, and the work of others, in designing connectivist MOOC environments and other connected learning experiences. Discussion of social media, personal learning environments/networks, and networked affordances underscore the presentation. Participants will come to better understand the foundations of networked learning, and how such learning can be nurtured in complex MOOC environments as well as traditional classroom or blended environments.

Dr. Alec Couros is a Professor of educational technology and media at the Faculty of Education, University of Regina.
