

ENABLING MOBILE LEARNING

The proliferation of mobile devices and tablets across educational institutions is transforming classroom learning. Traditional paper textbooks are being replaced with digital books on tablets, and students are reaping the benefits of always having the latest information at their fingertips. Textbooks are brought to life with interactive text, 3D graphics, video and audio. More than 20,000 educational applications are available to help students with everything from vocabulary words to understanding the anatomy of the human brain.

AirWatch is helping Schools and Universities embrace the next generation of learning with educational apps, eBooks and learning content on mobile assets. With AirWatch, you can track all mobile assets across your staff and student community, it allows you to configure policies and settings, distribute and manage Apps while maintaining secure access to institution's networks and resources all through our web-based console. Using AirWatch content Management, from a textbook to a syllabus, sensitive files can now be distributed to student and faculty devices. AirWatch's Secure Content Locker provides a secure and easy-to-access portal where textbooks, documents or videos can be stored, updated and distributed for access via a tablet device.

AirWatch MDM Solution also allows IT administrators to ensure devices are compliant with institution's digital policies and monitor violations in real time. Hence, empowering educational Institution's to maximise the use of mobile investment for Teaching and Learning.
